Portuguese (Native)

English (Intermediate)

EXPERIENCE

Autoridade Tributária e Aduaneira - Backend Developer

Axiants Portugal

2025 - Now

- Embedded Java web application development (POSEI)
- Technologies: Java, JavaServer Faces (PrimeFaces), JavaServer Pages (JSP), JavaScript (Vanilla)
- Agile methodologies (Scrum, Kanban)
- Unit testing (JUnit)
- Database management (Oracle PL/SQL)
- Code reviews (Bitbucket)

PRR (Recovery and Resilience Plan) - Fullstack Web Developer

Axiants Portugal

2024 - 2025

- Contributed to web platforms for “Recuperar Portugal (PRR)”
- Built reusable components and scalable solutions with Laravel, Alpine.js, Livewire (PHP)
- Managed infrastructure with Docker and CI/CD pipelines
- Integrated APIs (REST, SOAP)
- Collaborated on code reviews (Bitbucket)

Fullstack Web Developer (Freelancer)

RW Interactive

2023 - 2024

- Delivered and maintained Laravel-based applications for international clients
- Resolved support tickets and documented solutions.
- Used Docker containers to set local development environments
- Built frontend components in Vue.js, always mindful of user experience
- Integrated and consumed external APIs

Army's Financial Department - Accounting Technician

Portuguese Army

2015 - 2023

- Managed payroll data processing involving very high-volume datasets
- Monitored and controlled debts from undue payments, including registration, follow-up, and recovery through the “Portal das Finanças”
- Developed control systems and process automation for accounting records, improving accuracy and efficiency
- Redesigned the extra-budgetary undue payments accounting system, enabling timely traceability of processes
- Built data analysis and summary reports with Power Query to identify discrepancies and support accounting entries
- Automated bank statement extraction and reconciliation through scripting
- Created a system to calculate average balance values for mandatory external reporting
- Supported Treasury operations, streamlining routine tasks
- Collaborated with the Accounting team to implement automation for SAP entries

PROJECTS

APAC - Associação de Pais Agrupamento de Escolas Augusto Cabrita

Association website developed with Laravel.

- Server and infrastructure management (VPS, Ubuntu, NGINX, Docker);
- Databases management (MySQL);
- CI/CD (GitHub Actions);

Uprising Forward

Music festival promoting website development (HIM DUB FESTIVAL). Ticketing system implementation and administration dashboard.

- PHP (Laravel), JavaScript (Vue.js), Inertia.js, Tailwind CSS, MySQL;
- Infrastructure and deploy (Linux, Docker, CI/CD, GitHub Actions)

CAREER RESUME

2009 After completing my ICT Technician course, I briefly worked as a Web Designer

2012 I joined the Portuguese Army

2015 After finish Military Staff Sergeant's course, I started to work in «Departamento de Finanças do Exército», as Accounting Technician

2023 Got my BSc in Computer Science and, alongside my military career, I've been working as a freelance Fullstack Web Developer, as well on some personal projects

2024 Started an IT consultant career, as Fullstack Web Developer

2025 Currently working as Java Backend Developer on embedded web applications for “Autoridade Tributária e Aduaneira”

SOFT SKILLS

Self-direction | Critical thinking | Problem-solving | Conflict resolution | Resilience |

Creativity | Growth mindset | Works well under pressure
